IDEATION PHASE

DATE	10 SEPTEMBER 2022
TEAM ID	PNT2022TMID46185
PROJECT NAME	IOT BASED ON SIGNS WUTH SMART CONNECTIVITY FOR BETTER ROAD SAFETY
MAXIMUM MARKS	2 MARKS

PROBLEM STATEMENT

I am	I'm trying to	But	Because	Which makes me feel
To replace the static sign board smart connected signs boards are used	These smart connected sign board get the speed limitation from a web app using weather API and automatically update	Based on a weather changes speed may increase or decrease	Based on the traffic and the fatal situations the diversion signs are displayed.	Guide (school) warnings and service (hospitals, restaurant) signs are also displayed accordingly.
